Onabiyi Olamide — Resume

onabiyiolamide@gmail.com | olamidee.dev | GitHub | LinkedIn | X

Summary

Software engineer who builds web apps with **React, Next.js and TypeScript**. I built the frontend of **Doors**, a vacation home booking site, from scratch. Right now I'm learning backend with **Effect**: auth, keeping data in sync, and building ledgers. I love accounting, so ledgers are my favourite part.

Skills

- **Languages:** HTML, CSS, JavaScript, TypeScript
- **Frameworks:** React, Next.js
- **Technologies:** REST, PWA, Vite, Jest, Cypress, SQL databases
- **Tools:** Git, GitHub, Figma, Notion

Work Experience

Doors | Frontend Developer

trydoors.com · Aug 2026 – Present

- Built the frontend of **Doors**, a vacation home booking platform for short stays across Lagos, **from the ground up**.
- Shipped the **customer experience**: search by place, dates and guests, curated listings and booking.
- Built the **admin dashboard** the team uses to manage properties and listings.
- Own **frontend performance**, benchmarking Core Web Vitals and tuning how pages load and render so the product stays fast as new features ship.

AI Headshot | Frontend Developer

Apr 2024 – Aug 2024

- Built responsive pages with Next.js and Tailwind CSS, cutting page load time by a measured **30%**.
- Implemented **20+ reusable React components**, reducing development time by an estimated **20%**.
- Shipped **3+ new features** that improved the platform experience.
- Strengthened collaboration with **structured pull requests** and clear documentation.

HNG | Frontend Developer

Apr 2024 – Aug 2024

- Delivered **pixel-perfect implementations** with Next.js and Tailwind CSS, working with designers to keep visuals consistent.
- Improved load times by **35%** with memoization, lazy loading and asset optimization.
- Contributed through Git and GitHub, **PR reviews**, Jira tickets and site deployments.

Projects

Shop Sphere | E-commerce Platform

React, TanStack Start, TypeScript, SQLite, Redis

- Built an **e-commerce platform** that makes buying easier and gives sellers simple product tools and better analytics.
- Built **seller, buyer and admin views** with a seamless experience for every user type.
- Used **React Aria** for accessible components that follow accessibility best practices.
- Engineered the **backend with SQLite**, using type-safe server functions in TanStack Start.

Wecare | Healthcare Appointment Platform

Next.js, SQLite, Drizzle ORM

- Engineered a **direct-to-doctor appointment platform** for booking sessions and managing care outside traditional hospital settings.
- Built **patient and doctor interfaces** for registration, profile management and **appointment scheduling**.
- Added **video calls** so patients and doctors can meet within each session.

Spherule | Automotive Marketplace

React, TanStack Start, Postgres, UploadThing

- Built an **online marketplace** for buying and selling vehicles.
- Integrated **Paystack payments** so sellers receive their money instantly after a sale.
- Shipped **advanced search and listings** that match buyers with the right vehicles.

Segment | Community Book-Sharing Platform

React, Tailwind CSS, Supabase, Postgres

- Built a **book-sharing platform** that connects people with unwanted books to readers looking for new material.
- Designed a simple flow for **donating and discovering books** within the community.
